

Project Management 7th Edition

SEHG-CD-7789 · Business · approx. 12 min seat time · English · 100% online, self-paced

Accreditation & industry alignments: none verified on record — institutional accreditor mapping pending

COURSE DESCRIPTION

With the increasing demand for efficient project delivery, mastering the art of project management has become a critical skill for both businesses and individuals. Project management is the practice of planning, organizing, and managing resources to achieve specific goals and objectives, while adhering to the predefined project parameters. It provides control over the project lifecycle, from its initiation to its completion. Whether a business is planning a small-scale project or a large-scale initiative, effective project management is the key to ensuring success. The Project Management 7th Edition course will cover principles and techniques in accordance with the Project Management Body of Knowledge (PMBOK) 7th Edition, which is the globally recognized standard for project management best practices. Participants will gain an understanding of value delivery, project management principles, as well as performance domains that are important for final delivery outcomes. As the world continues to change with technology evolving and new organizations emerging, it's important to reconsider the global perspectives that are found within the PMBOK Guide.

WHO THIS COURSE IS FOR

Working professionals, team leads, and career-changers who want practical, job-ready Business skills — no prior coursework required. Teams and organizations can enroll groups for consistent, measurable upskilling.

SKILLS & LEARNING OUTCOMES

Upon completion, the student will be able to:
